

# Gregory K. DeGrande

## *Asbestos Program Director*

---

### Background

Greg DeGrande has over 21 years experience as a project manager, air sampling professional and asbestos management planner for asbestos management projects. In addition, Greg has managed multiple environmental consulting projects including ESAs, remediation, tanks and container management, regulatory compliance, and water quality management.

Greg's wide range of expertise in Asbestos and LBP Management consists of project management, building and facility inspections, operations and maintenance programs, design and specifications, and air monitoring surveillance. He is also very effective in providing turnkey consulting services for asbestos abatement projects.
