

John C. La Velle

Senior Project Manager

Background

John La Velle, Project Manager, has over 21 years experience managing projects in Asbestos and LBP Management, Facility Decommissioning, Tank and Container Management and Remediation Services.

John's experience in Asbestos Management consists of hands-on field management to extensive consulting projects. He has performed numerous inspections for multiple industries including school districts, hospitals, government and industrial facilities.

John's experience in Facility Decommissioning consists of proposal and cost development in an effective approach to minimize environmental impacts on facility closures. Emphasis was placed on specific site health and safety development, contractor coordination, and project management over the environmental work force, which included subcontractors along with client interface and troubleshooting obstacles to prevent project delays.
