

G. Leston Porter, Jr., RG, CHMM

Hydrogeologist

Background

Leston Porter has over 15 years experience as a Hydrogeologist. Mr. Porter currently manages three business segments, including Environmental Site Assessments, Remediation Services, and Tank and Container Management.

Leston has expertise in Phase II ESAs (subsurface investigations). Leston's project management experience includes characterization and remediation of sites with soil and groundwater contamination and investigations at RCRA or CERCLA sites. Mr. Porter's extensive expertise includes subsurface investigations, corrective action plans, remedial activities, and groundwater sampling, as well as over 30 emergency response projects. Leston has overseen remedial actions of hazardous and nonhazardous contaminated soil and groundwater for Federal, State, and local agencies. Leston has experience in decommissioning regulated and non-regulated storage tanks, characterization of unknown chemicals, and coordination with disposal facilities for the proper consolidation and disposal of numerous hazardous and nonhazardous chemicals.
