

Kimberly A. Roberts

Environmental Scientist II

Background

Kimberly Roberts has over 14 years professional experience as an Environmental Scientist. Her experience and education in environmental science provides her with the expertise necessary to efficiently and effectively offer solutions to Air Quality issues and Regulatory Compliance.

Kim's specific expertise includes air permitting and compliance, air dispersion modeling, and air emissions measurement. She has experience in calculating emissions to be used for emission inventories and construction or operating permits and has working knowledge of many Federal, State, and local air regulations.

Kim's expertise in regulatory compliance includes performing on-site facility audits, developing compliance notebooks and EPA/OSHA programs. Additional expertise includes SARA reporting, Environmental Site Assessments (ESAs), and stormwater sampling & reporting.

Education

University of Michigan
B.S., Mathematics and German

Professional Affiliations

- Air & Waste Management Association

Expertise

Air Quality Management

- Permits and Compliance
- Source Testing
- Emission Inventories
- Dispersion Modeling

Environmental Site Assessments

- Phase I ESAs

Regulatory Compliance

- Facility Audits
- Environmental Notebooks
- Plans and Reports
- OSHA/MSHA Compliance

Water Quality Management

- Discharge Permits and Compliance
- Outfall Sampling
- Process Evaluations
